Product Description

The EtherNet/IP ArmorBlock is a 24V DC I/O module that communicates via EtherNet/IP. The sealed IP65, IP67 and IP69K housing of these modules requires no enclosure. Note that environmental requirements other than IP65, IP67 and IP69K may require an additional appropriate enclosure. I/O connectors are sealed M8 style. EtherNet/IP networks use advanced network technology, for example, producer/consumer communication, to increase network functionality and throughput.
