Product Description

The MVI46-MNET module is a single slot solution that provides a powerful connection between Rockwell Automation's SLC processor and Modbus TCP/IP network applications. The TCP/IP Modbus network applications include those networks hosted by Modicon Quantum processors, networks controlled by operator interface software packages, and the growing number of manufactured devices that support this protocol. The module acts as an input/output module between the Modbus TCP/IP network and the Rockwell Automation backplane. The data transfer from the processor is asynchronous from the actions on the Modbus TCP/IP network. A 5000-word register space in the module exchanges data between the processor and the Modbus TCP/IP network.

Mainly Products

PLC module	Redundancy Module	
DCS module	Analog input module	
CPU module	Analog output module	
IO module	Digital input module	
DO module	Digital output module	
Al module	Relay Output Module	
DI module	Relay Input Module	
Power Module	Motion control module	
Ethernet module	Network communication module	

Application

- 1. Power industry, the elevator industry, parking, automobile, auto ancillary.
- 2.feed industry, aluminum smelting machines, refrigeration industry.
- 3.steel industry, combustion control systems, non-ferrous metal smelting.
- 4.glass industry, construction machinery, textile machinery, water treatment

- 1.High quality 2.Fast Delivery
- 3. We provide a large number of brand new in stock.
- 5. There are many products in stock.
- 6. We only provide the original new items, 100% make sure the best quality!
