#### Product Description

The SST<sup>™</sup> PB3 Remote Module for PROFIBUS is a "Linking device" with on-board Profibus and Ethernet communication ports that provide a fast and easy solution for adding Profibus Master and Slave connectivity to Rockwell Logix controllers (CompactLogix, SoftLogix). This unique remote concept offers the same features as an in-chassis module but with extra functionalities and services due to its flexible remote design. For example, the PB3 Remote Module reduces the cost of expensive Profibus cabling when used in environments where controller and field devices are a long distant apart.
