Product Description

Our PowerFlex® 527 AC Drives are designed to work exclusively with our Logix Programmable Automation Controllers (PACs). This allows the drive to leverage the capabilities of the controller and use Studio 5000 Logix Designer™ to help simplify machine development and use. This streamlined approach uses motion instructions that are shared by PowerFlex 527 AC drives and Kinetix® servo drives, providing the same user experience for configuration, programming, and control of both types of drives.
