Product Description

Our CompactLogix™ and Compact GuardLogix® 5380 controllers enhance performance, capacity, productivity and safety to help meet the growing demands for smart machines and equipment in manufacturing. All standard and security controllers feature a modern programming environment, the Studio 5000 Logix Designer® application, which allows users to design and maintain systems collaboratively. This common environment optimizes efficiency, reduces commissioning time and manages integrated EtherNet/IP™ -based motion for high speed motion applications and even SIL 3/PL safety solutions. These controllers are ideal for applications requiring high-performance communications, I/O, and motion control up to 32 axes.
