Product Description

The Guardmaster® 440C-CR30 configurable safety relay building block monitors the status of the 440C-CR30 safety relay through a Modbus RS-232C interface. This quick start provides instructions for how to connect the Micro800® programmable logic controller (PLC) with the safety relay for status updates. Use this quick start to configure a monitoring system for your 440C-CR30 safety relay. To help with the design and installation of your system, application files and other information are provided on the Connected Components Accelerator Toolkit (CCAT). The CCAT provides bills of materials (BOM), CAD drawings for panel layout and wiring, control programs, human machine interface (HMI) screens, and more. With these tools and the built-in best-practices design, you are free to focus on the design of your machine control and not on design overhead tasks
