Product Description

The SST[™] Communication Module connects Rockwell SLC 500 PLCs as a Master or Slave to scan or emulate PROFIBUS DP I/O. With the user-defined data space of 2064 bytes Input and 2064 bytes Output, the SST[™] Profibus module provides a cost-efficient solution to connect SLC CPUs with large PROFIBUS networks. A 9-pin serial port included on the scanner allows for firmware upgrades in the field and the upload of I/O configurations.
