Product Description

HONEYWELL 10105/2/1 SC S300 ANALOG INPUT MODULE

Technical Application

Safety Manager SC is our third generation safety platform and a logical evolution of Safety Manager. Still using our proven QMR (2oo4D) architecture, the new design is more modular and scalable than previous designs while providing the highest levels of safety and availability protection

Safety Manager SC utilizes a Universal IO structure that allows the highest level of flexibility when designing systems small to large. As customers recognize the advantages of highly distributed systems using remote IO, this architecture is the most efficient in terms of size and cost.

Safety Manager SC is a modular, multi-fault tolerant safety system capable of solving the most challenging Emergency Shutdown (ESD) / Safety Instrumented System (SIS) applications in the Process Control industry. It is certified by TUV Rheinland for use in safety applications up to Safety Integrity Level 3 (SIL3).
