Our Product Introduction

### **Product Description**

Bently Nevada 3500/65-01-01 PLC Temperature Monitor Module

## **Technical Application**

The 3500/65 monitor provides 16 channels of temperature monitoring and accepts both resistance temperature detector (RTD) and isolated tip thermocouple (TC) temperature inputs. The monitor conditions these inputs and compares them against user-programmable alarm setpoints.

The monitor is programmed using the 3500 Rack Configuration Software. You can configure the 16-Channel Temperature Monitor to accept isolated tip thermocouples,3-wire RTD, 4-wire RTD, or a combination of TC and RTD inputs.In Triple Modular Redundant (TMR) configurations, the monitor uses 2 types of voting to ensure accurate operation and to avoid singlepoint failures.
