Product Description

Product Description

BENTLY NEVADA 3500/53-03-01 DISPLAY OVERSPEED PROTECTION MODULE

Technical Application

The 3500/93 System Display is designed to meet the requirements of American Petroleum Institute (API) Standard 670 and provide local or remote visual indication of all 3500 Machinery Protection System information residing in the rack including: System Event List Alarm Event Lists All Channel, Monitor, Relay Module, Keyphasor* Module or Tachometer Module data.

The 3500/93 System Display is configured using 3500 Rack Configuration Software. The display can be mounted in any of four ways:

Face Mounting – display installs directly over the front panel of any full size 3500 rack using a special hinged support. This permits access to the rack's buffered output connectors and user-interface buttons and switches without disconnecting or disabling the display.

Note: For this mounting option only, the Display Interface Module (DIM) must be installed in slot 15 (right-most slot) of the rack. The Face Mounting option is not compatible with the 3500 Mini-rack.
