Product Description

Product Description

BENTLY NEVADA 177313-01-01 TK3 PROXIMITY ELECTRIC DRIVEN MODULE

Technical Application

The 3300 XL Proximity Sensor incorporates numerous improvements over previous designs. Its physical packaging allows you to use it in high-density DIN-rail installations.

You can also mount the sensor in a traditional panel mount configuration, where it shares an identical 4-hole mounting "footprint" with older Proximity Sensor designs.

The mounting base for either option provides electrical isolation and eliminates the need for separate isolator plates.

The 3300 XL Proximity Sensor is highly immune to radio frequency interference, allowing you to install it in fiberglass housings without adverse effects from nearby radio frequency signals. The 3300 XL Proximity Sensor's improved RFI/EMI immunity satisfies European CE mark approvals without requiring special shielded conduit or metallic housings, resulting in lower installation costs and complexity.

The 3300 XL's SpringLoc terminal strips require no special installation tools and facilitate faster, more robust field wiring connections by eliminating screwtype clamping mechanisms that can loosen.
